University of Toronto Press Higher Education Division

The aim at UTP Higher Education is to publish materials for course use that are pedagogically valuable and that contribute to ongoing scholarship. Working as a division within UTP offers exciting opportunities to pursue this goal and to meet the changing needs of teaching and scholarship in North America. The possibilities for rethinking how texts can be used in the classroom, along with new formats for their delivery, are endless, and UTP looks forward to partnering with instructors and scholars in this innovative endeavour!

UTP Higher Education acknowledges with thanks the assistance of Livres Canada Books.

UTP Higher Education gratefully acknowledges the financial support of the Government of Canada through the Canada Book Fund for our publishing activities.

“The University of Toronto Press has resisted the increasingly cookie cutter approach of most major publication houses and reliably produces books that are smart, accessible, important, and, dare I say it, fun. Few presses cover such a wide range so well and their eye for interesting books that matter is laudable.”

– Eric Selbin, Southwestern University

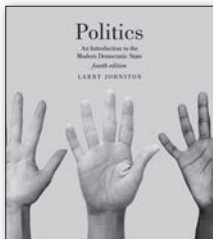

“I have been increasingly impressed with the University of Toronto Press. Their books make important contributions in a diverse range of fields of knowledge, from queer politics to political economy, political institutions to the politics of cities.”

Power, Money, and Trade is an introduction to international relations that uses examples from international political economy rather than security issues. It presents the theories and paradigms of IR in the contexts of trade,

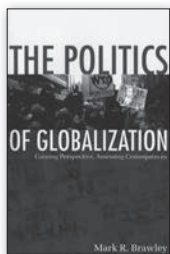

investment, and monetary relations. It does so largely by developing historical cases of pivotal events in the evolution of the IPE to illustrate the strengths and weaknesses of these theories. The result is a book that not only reveals and explains prominent arguments and debates but also provides grounding in the history and structure of the IPE.

XXL: Obesity and the Limits of Shame

BY NEIL SEEMAN AND PATRICK LUCIANI
(BOTH AT UNIVERSITY OF TORONTO)

2011 6x9 paper 192pp 978-0-7727-8627-2
US & CDN \$19.95

"This slim book is fat with data and ideas and stands on the imaginative frontier of a very fast-moving public policy debate. It's bound to cause controversy and thought as we face the public health challenge of trying to engineer weight control."

— Michael Bliss, University of Toronto

XXL directly confronts the global public health sector by proposing an innovative, alternative policy—the “healthy living voucher”—for decreasing high calorie consumption and its related health problems.

Neil Seeman and Patrick Luciani argue that many public health campaigns have made the problem of obesity worse by minimizing how difficult it is for individuals to lose weight. *XXL* challenges governments to abandon top-down planning solutions in favour of bottom-up innovations to confront the obesity crisis.

CONTENTS:

- Introduction: The Genesis of Shame
- Part 1: The Paradoxical Costs of Fat
- Part 2: (Nearly) Everything Causes Obesity, and (Almost) Everyone is Different

Written from a multidisciplinary approach, *Canada at the WTO* presents a clear picture of how resolutions made at the international level affect Canadian politics, industries, and employment.

BY DAVID E. SMITH (UNIVERSITY OF SASKATCHEWAN)

2010 6x9 paper 240pp 978-1-4426-1151-1

In *Federalism and the Constitution of Canada*, David E. Smith examines a series of royal commission and task force inquiries, a succession of federal-provincial conferences, and the competing and controversial terms of the Constitution

Act of 1982 in order to evaluate both the popular and governmental understanding of federalism. In the process, Smith uncovers the reasons constitutional agreement has historically proven difficult to reach and argues that Canadian federalism "in practice" has been more successful at accommodating foundational change than may be immediately apparent.

Dominance and Decline provides a comprehensive, comparative account of Canadian election outcomes since 2000. Through an analysis of election trends, it provides insight into the dramatic reconfiguration of parliament following the 2011 federal election—in which the Liberal Party failed to hold enough seats to act as official opposition and recorded its lowest ever share of the vote—while also revisiting and assessing a variety of voting theories in light of this analysis.

"Leuprecht and Russell have put together an impressive collection of articles by some of the best thinkers on Canadian constitutional politics. This important compendium will be extremely useful to scholars and others seeking the essentials on Canada, as well as to those looking at Canada in a comparative context."

— David Biette, Woodrow Wilson International Center for Scholars

"This invaluable collection of classic works on Canada's constitutional governance provides the perfect foundation for a variety of undergraduate and graduate courses in Canadian politics."

— Kristin Good, Dalhousie University

In recent years, the emphasis in research and teaching on the Canadian Constitution has increasingly focused on the Charter, much to the detriment of many other dimensions of Canadian constitutional politics.

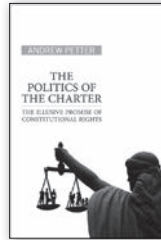

This collection of key readings considered foundational to teaching and researching the Canadian Constitution offers a corrective to this trend. It focuses on pieces that have emerged over time as core to the sub-discipline, as well as selections that round out a full and rich discussion of the constitution.

The Politics of the Charter: The Illusive Promise of Constitutional Rights

BY ANDREW PETTER (UNIVERSITY OF VICTORIA)
2010 6x9 paper 256pp 978-0-8020-9599-2
US & CDN \$29.95

In *The Politics of the Charter*, Andrew Petter assembles a set of his original essays written over three decades to provide a coherent critique of the political nature, impact, and legitimacy of the Canadian Charter of

Rights and Freedoms. Showing how Charter rights have been shaped by the institutional character of the courts and by the ideological demands of liberal legalism, the essays contend that the Charter has diverted progressive political energies and facilitated the rise of neo-conservatism in Canada.

In *Against Reform*, John Pepall offers a stringent critique of proposed reforms to Canada's political institutions. Examining electoral reform, an elected or provincially appointed Senate and reduced terms for

Senators, fixed election dates, recall, initiative, and parliamentary reform, Pepall contends that these reforms are ill-conceived and would be harmful. While considering influential factors such as academic and media bias, political fashion, and the American example, Pepall's unique and highly readable assessment takes aim at the practical and theoretical understandings of reform across party lines.

Court Government and the Collapse of Accountability in Canada and the United Kingdom

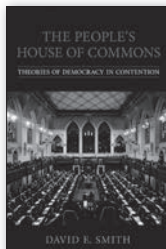

BY DONALD J. SAVOIE (UNIVERSITÉ DE MONCTON)

2008 6x9 paper 416pp 978-0-8020-9579-4
US & CDN \$35.95

In this comparative study, Savoie argues that both Canada and the UK now operate under court government—meaning power rests with the prime minister and a small group of selected courtiers—rather than cabinet government. Throughout, Savoie examines value changes both in society and inside government, and calls for new accountability requirements that correspond with court government as well as new relationships between politicians, civil servants, and citizens.

The People's House of Commons: Theories of Democracy in Contention

2007 6x9 paper 217pp 978-0-8020-9465-0
US & CDN \$28.95**WINNER OF THE 2007 DONNER PRIZE**

Through an examination of academic, judicial, political, and legal commentary, *The People's House of Commons* unpacks the inherent tensions affecting public opinion of the House. Smith maintains that court decisions are trans-

forming politics from a system dominated by parties to one that promotes individual participation. He argues that the implementation of reforms, such as fixed election dates, have constitutional significance since they alter the practice of responsible government, which for more than a century has been a party government. A definitive work by one of Canada's foremost experts in the field of political science, *The People's House of Commons* explores the ramifications of many of the changes being proposed to Canada's political system.

"I strongly recommend this anthology for undergraduate and graduate courses in Canadian political thought and for citizens who wish to know more about the best of their own traditions."

—James Tully, *University of Victoria*

This anthology presents selections of Canadian political thought, from the nineteenth century to the present, in order to demonstrate how ideas evolved over time to influence the values and debates of modern Canadians. The readings are generally arranged chronologically, but the three currents of thought that inform the selections are Canada's relation to the US, English Canada's relationship with French Canada, and the nature of "Canadian" social justice.
